CAMPAIGN TO END THE SALE OF BOTTLED WATER:

Bottled water is the cause of many multi-faceted problems on the micro level, the individual student, and on the macro level, our global environment. Bottled water is seen as a threat to our wallets and a threat to our health. We hope to achieve an environment that aligns with the social justice missions of our Jesuit forefathers, and the good values all Loyola students should embody.

• Impact
Through this we hope to raise awareness about the issue of water privatization and the surrounding social and environmental issues

• Next Steps
To end the sale of bottled water and unite Loyola University Chicago in becoming more environmentally and socially aware.
